GARDENA, CAL.

TELEGRAPH and CABLE ADDRESS "BODGER"
LOS ANGELES

BEFORE submitting our contract prices for consideration during the Season of 1908, we desire to thank our many customers for the liberal patronage given us in the past seasons, and with the merits of our Seeds, we respectfully solicit your future favors.

The past two seasons, as a whole have not been of the most prosperous nature, as we have had to contend with the usual bad condition of land in opening a new territory, and poor Springs for starting crops.

We have now succeeded in getting our entire acreage under irrigation and in good condition for seed growing, and have become sufficiently acquainted with climatical conditions to believe we are able to give the necessary satisfaction in all items enumerated in this list, especially TOMATOES, SEED BEANS, LETTUCE, SWEET PEAS, ASTERS, COSMOS, and other flower seeds, which are our principal crops.

TERMS—All prices quoted on basis of f. o. b. California, and forwarded at best possible rates.

Flower and Vegetable Seeds 2% in 10 days or Net in 60 days from date of invoice; Beans Net in 30 days. All overdue accounts subject to sight draft without further notice.

Seamless bags and all containers charged for at cost.

Non-Warranty—We exercise the greatest care in growing and harvesting our Seeds, roguing our crops under personal supervision, to the best of our ability, true to name, and send out nothing but what we believe will give satisfaction. It must, however, be expressly understood that we warrant neither description, growth or productiveness of any seeds we deliver, nor will we hold ourselves responsible for the crop raised from any of the Seeds we grow.

If our goods are not accepted on these terms they must be returned at once.

Our Seeds have now been selling on their merits for the past fourteen years, and by observing the steadily increasing demand, we believe they have given general satisfaction, but should any variety not have been as represented, we hope our patrons will acquaint us therewith.

Yours respectfully,

JOHN BODGER & SONS

TOMATOES.

We were among the first who grew Tomato seed as an experiment in California, and the general satisfaction which our seed has given, together with the rapid increase of business in the past four years, has convinced us that it is an experiment no longer; seedsmen in general are looking to California as a source of supply for Tomato seed, as they do for Onion, Lettuce, Sweet Peas, etc.

We have the ideal climate for maturing Tomatoes for seed purposes, and this, with our new and improved seed separator, enables us to deliver a plump and bright sample of seed.

We are growing the following varieties from carefully selected stock seed:

	25 lbs. per lb.	100 lbs. per lb.

Sweet Mountain80	.70

BEANS.

We plant a large acreage to Beans every season in varieties as listed below, from carefully selected stocks, and are in a position to quote as low as any California grower for reliable and merchantable Beans, but as prices depend wholly upon the amount of rainfall each season and general conditions before planting time, it is impossible to make fixed prices until March. Kindly advise us of your probable requirements of each variety and we will be pleased to submit our best prices in good time for placing early contracts.

SWEET PEAS.

Our success in the past two seasons has convinced us that we now have one of the finest locations for growing and maturing a seed crop of this favorite flower; in view of this fact we have made Sweet Peas one of our specialties.

We believe the following to be a full list of all desirable varieties, both new and old, and are planting a large acreage to the same. We find it essential to plant this crop early in the fall to obtain the best results, therefore we respectfully ask our patrons to consider the placing of contract orders as early as possible.
